

THE ENGINEERED DENTURE®

Because you deserve the best denture available!

You owe it to yourself to experience the best denture that modern dental technology and techniques can provide . . . The Engineered Denture®.

The Engineered Denture® is quite different. It uses revolutionary principles in denture construction. The techniques and equipment used in its fabrication are far superior to what's available on the market today.

All you will have to do is eat one good meal and the denture will speak for itself. Imagine what it will be like to have maximum chewing efficiency.

Our Method

1

Initial Consultation

Dr. Gagne studied advanced denture fabrication techniques with nationally known dentists in the field of complete dentures. At your initial consultation Dr. Gagne will be able to evaluate your condition and make an appropriate recommendation as to what is best course of treatment for you.

2

Detailed Impressions of your Mouth

High quality impressions that adequately capture all the detail of your facial structure and muscles are the key in complete denture fabrication. Dr. Gagne's extensive training and experience in complete denture construction gives you the best result possible for your mouth.

3

Quality Laboratory Work

Our denture technicians have decades of experience in full denture and partial denture fabrication. They make sure the lab produces only the highest quality of work. You will see the quality when you wear the Engineered Denture.®

4

Careful Fitting of the Denture in your Mouth

We take care to make sure the Engineered Denture is the most comfortable denture you have ever worn. Its fitting to your mouth is just one of the many steps assuring you of a successful complete denture (or partial denture) outcome.
